

DEMO LAND DEED

Generated from the seeded parcel register for mutation-flow demonstration

Parcel ID	p-511
Dag number	BS-511
Khatian number	901
Registered owner	Md. Karim Uddin
Land description	Lowland paddy field
Document class	Sale Deed

Registry statement

This demonstration deed identifies the parcel using the authoritative Dag and Khatian values stored in the application database. It is intended only as sample input for OCR extraction and land-officer review in the mutation workflow.

Review boundary

Automated extraction may copy visible values from this file, but it does not approve, reject, or classify the mutation. Missing values must be entered by a land officer, who then chooses whether to accept the deed into the record or send it to fraud review.

Citizen signature	Land-office receipt

Demo reference: DEED-P-511 | Source owner ID: usr-karim
